

WEEK-8

CREATIVITY, PROBLEM SOLVING AND INNOVATION

Play an improvisation game by going sequentially starting with group leader who make a one line statement on any thing comes to his/her mind. Then sequentially next person continues to make a connecting sentence by starting with and... as if to make a story by whatever comes to his/her mind which appears to be connecting. Keep going for minimum 2 cycles that is 12 lines (and maximum as long as possible in 20 minutes) as an improvisation story. It is quickly written by a volunteer who also must contribute by giving his/her sentence. The goal is to quick thinking to make a totally unpredictable outcome for fun.
